FOR IMMEDIATE RELEASE

## **MCN65 Metal Connector Nailer Wins PTIA Award**

**With its Best-In-Class Power to Weight Ratio, Enhanced Safety  
and Simplified Maintenance.**

EVERWIN is proud to announce that its 65mm (2 1/2") Metal Connector Nailer, the MCN65, has been recognized as a game-changer and winning the PTIA Award in the metal connector category. Setting new industry standards, the MCN65 addresses key challenges faced by construction professionals, such as tool weight, safety concerns, and maintenance complexity.

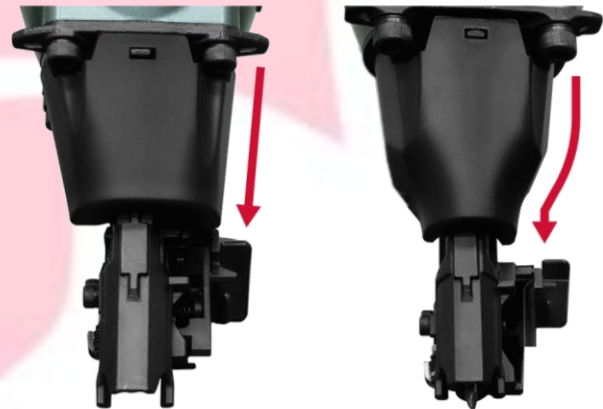

### **Best-in-Class Power-to-Weight Ratio**

The MCN65 sets itself apart with its remarkable power-to-weight ratio. Weighing just 5.6 lbs (2.55 kgs), this tool is specifically designed for ergonomic excellence, making it easier to handle during extended overhead use. Despite its lightweight design, the MCN65 packs an impressive 680 inch-lbs of driving power, outperforming competitor models and providing smooth, consistent nail flush in all types of engineered lumber.

Brand	Model	Weight	Driving Energy (in-lbs)	Power/weight Ratio
 	MCN65LM	2.75kg (6.06 lbs)	680	<b><u>112.21</u></b> <sup>WIN</sup>
 	NR65AK2	2.95kg (6.51 lbs)	612	94.01
 	MCN250	2.72kg (6.01 lbs)	580	96.51

**Enhanced Safety Features for Reliable Performance**

EVERWIN's MCN65 features innovative safety elements, including an anti-backup pawl that ensures consistent nail placement and minimizes jamming or dangerous ricochets. This critical feature prevents nails from backing into the nose channel, enhancing the tool's reliability on-site. Additionally, the contact arm cover has been tapered to improve visibility, enabling precise nail placement in pre-punched metal connector holes.

**Simplified Maintenance for Maximum Uptime**

In a field where time is money, the MCN65 offers exceptional ease of maintenance. The choice of a mechanical contact arm over more complex pneumatic versions results in simpler, quicker, and more cost-effective upkeep.

## OFFICIAL PRESS RELEASE

### Additional Features That Make the MCN65 a Top Performer

- **All-Metal Cap Unit:** Built for durability and easier maintenance.
- **Rotatable Rafter Hook:** Enhances job site convenience and tool accessibility.
- **Low Nail Lockout:** Prevents dry firing to extend tool life and protect the work surface.
- **Extended Magazine Option:** Increases nail capacity to 55 nails, minimizing reload interruptions.
- **Reinforced Contact Arm:** Designed for durability and reliability in the toughest job site conditions.

### The Verdict from PTIA Industry Experts

"EVERWIN nailers have been on our radar for years, consistently delivering reliable performance in the field. The latest enhancements to their joist hanger nailer make it even better. With a superior power-to-weight ratio, reduced jamming, improved line of sight, and easier maintenance, the MCN65 is a standout performer that continues to raise the bar in its category," added industry insiders.

The EVERWIN MCN65 Metal Connector Nailer is setting a new benchmark for what professionals can expect in terms of power, safety, and durability. With its innovative design and user-focused features, the MCN65 is built to lead the way in productivity and precision for construction experts.
